Exercise. Modal

Modal component can be used to display content above enclosing view. Documentation is available on https://reactnative.dev/docs/modal.

Create a new Expo project displaying a screen which contains *Show modal message* as Pressable component. Documentation for Pressable component is available on https://reactnative.dev/docs/pressable.

If user presses the text, a modal screen opens with following content. User can close the modal by pressing Close, or on Android by using hardware back button.
